PROJECTS

On This Day in Space | github.com/epowelldev/p01-on-this-day-in-space | epowelldev.github.io/p01-on-this-day-in-space

- Space travel from home! Enter a month and day, you will be provided with 4 space related photographs. You will also get a launch photo and/or video.
- I used the Nasa API to get the 4 photos with description, date & time, and photo title. I called the API 4 times and created a function to get 4 random years, one for each call.
- APIs, JavaScript, jQuery, moment.js, Bulma, CSS, HTML

Sundial | <https://github.com/aparnell0130/SunDial> | sundial-time.herokuapp.com/

- Sundial is a time management system that allows a user to keep track of how many hours they spend per project on any given day.
- This was a group project, where I was substantially responsible for the backend functionality and frontend api calls. One example is the chart, where I had to aggregate the data to get the sum of total time spent on any project throughout the day then display it on the chart.
- JavaScript, jQuery, CSS, HTML, Express, Chart.js, Sequelize

Doodles With Friends | github.com/ToMakPo/Doodles-with-Friends | postnet-doodles-with-friends.herokuapp.com

- Doodles with Friends is a drawing game that is great for keeping up with friends and family online. Players try to earn points by guessing what another player is drawing.
- This was a group project, I was primarily responsible for the backend and frontend api calls. I also was responsible for implementing the signup and login system .
- JavaScript, React Bootstrap, CSS, Mongoose, MongoDB Atlas, Reactjs, Axios, Sockets, Express
